

Advantage through quality

Proudly made in Poland

Our company's history

How it started

Tenzi is a well-known Polish manufacturer of professional cleaning products and its history starts from 1999. Since our founding we have been guided by the motto "Advantage through quality". Our mission has always been to become a world-pillar manufacturer with a reputation that is synonymous with impeccable quality. Using our rich experience in the real sector, we have developed unique formulations and recipes that have been recognised by end-users in varie market niches, from HoReCa, Food Service, Households, Hospitality Sector, and to the Automotive and Manufacturing Industries. The successful implementation of our vision has contributed to success on the international markets. Tenzi products are now available in 53 countries on 4 continents.

#tenziacademy

Examples of pH values of various common substances

- Lemon juice - pH = 2.4
- Coke - pH = 2.5
- Vinegar - pH = 2.9
- Orange juice - pH = 3.5
- Beer - pH = 4.5
- Black coffee - pH = 5
- Milk - pH = 6
- Pure water - pH = 7
- Blood - pH = 7.1 - 7.4
- Seawater - pH = 9

Deep cleaning of heavily soiled indoor surfaces must be preceded by a thorough analysis due to their enormous variety. This makes it necessary to match the product to the specific characteristics of the dirt, the surface, and the application. Alkaline hygiene products for floors, furnishings, interiors, and food service facilities remove primarily organic dirt: animal and vegetable fats, lubricants, oil, soot, etc. Their variety is mainly the result of the use of different active ingredients. In the case of strong cleaning products, these may include sodium hydroxide, potassium hydroxide and active chlorine. Daily cleaning and care are done mainly with neutral products with a pH close to 7.

IMPORTANT! The aggressiveness of chemicals with water as the solvent depends not only on the reaction (pH), but also on the ingredients from which they are made.

Car body – removal of dirt

car wash

1. IPA CLEANER (ready to use) / paint, windows, rim degreaser 56

1 hygiene line

BRUDEX

CONCENTRATE. DEEP CLEANING OF FLOORS AND SURFACES (INDUSTRY, FOOD SERVICE) – ALL-PURPOSE.

An all-purpose cleaner and degreaser for removing organic dirt. Cleans, washes, removes stains and degreases in one operation. Recommended for maintaining hygienic conditions at home and industrial premises, as well as in kitchens and food service facilities. Certified by the National Institute of Hygiene.

WORKING SOLUTION / HOW TO USE:

- daily cleaning and laundry: 10-50 mL/10 L;
- thorough cleaning and laundry: 100-500 mL/10 L of water;
- stain removal, degreasing: 1:1 to 1:3.

1 L - UU006A001
5 L - UU006A005
10 L - UU006A010
200 L - UU006A200

2 hygiene line

TOPEFEKT® STR

CONCENTRATE. DEEP CLEANING OF FLEXIBLE FLOORS.

A low-foaming, alkaline product for machine and manual cleaning of all heavily soiled flexible floors. Dissolves greasy and oily dirt. Can be used as a stain remover for greasy stains on carpets. Recommended for cleaning surfaces such as PVC, linoleum, rubber, vinyl, lentex, as well as resin.

WORKING SOLUTION / HOW TO USE:

- manual cleaning: 100-300 mL/10 L;
- machine washing: 100-200 mL/10 L of water;
- thorough cleaning: 200-500 mL/10 L of water.

1 L - II001A001
10 L - II001A010

3 hygiene line

RONAL

CONCENTRATE. DEEP CLEANING OF STONE AND INDUSTRIAL FLOORS.

An alkaline product with a wide range of application, recommended for washing heavily stained stone floors (natural and artificial stone) and industrial floors. Removes all oil, grease and soot dirt. Characterized by a very intense effect on porous stoneware tiles. Does not leave streaks. Highly effective action.

WORKING SOLUTION / HOW TO USE:

- daily cleaning: 50-100 mL/10 L of water;
- thorough cleaning: 200-500 mL/10 L of water;
- removal of rubber marks from sealed floors: 1-3 L/10 L of water.

**RUBBER OFF**

CONCENTRATE. REMOVING VULCANIZED RUBBER DIRT FROM FLOORS.

A concentrated product for removing rubber, tire and other marks from all kinds of hard surfaces. Perfectly dissolves greasy dirt and adhesives used by athletes – resin and paraffin.

WORKING SOLUTION / HOW TO USE:

Works effectively in a 2-30% solution. Use a 2-5% solution for daily machine cleaning. Removes vulcanized rubber dirt from floors (10-30%). Concentrate may be used for spot cleaning.

- make a solution depending on the level of contamination
- apply on the soiled surface;
- leave for 1-2 minutes;
- scrub by hand or with a machine;
- collect the dirt and wash the surface with water;
- if necessary, repeat the operation.

READY TO USE. CLEANING OF SHOWER ENCLOSURE AND ITS ELEMENTS – SHINING EFFECT

Extremely effective and efficient product for daily cleaning and care of all elements of shower cabins. Perfectly removes soap deposits and hard water stains. Simultaneously cleans and shines surfaces, leaving a fine condensating film. Use of the product slows down the process of repeated soiling. Recommended for enamel, glass, acrylic and plastic parts of shower enclosures, wall ceramics and bathroom fixtures. Leaves a long-lasting, fresh scent.

WORKING SOLUTION / HOW TO USE:

Application:
shower cabins, wall ceramic tiles, bathroom fittings. Use without diluting; apply the product on the soiled surface; scrub with a sponge, rinse with water and wipe dry.

#tenziacademy

The choice of dishwashing product depends on a number of factors, including the nature of the food industry, the quality of the water, and the cleaning technique used. What is also important in the operations that accompany washing, such as shining, descaling, whitening, or drying. The choice of working solution should be adapted to the intensity of the soiling, but within the limits of the manufacturer's recommendations.

**GRAN® STON**

CONCENTRATE. USED FOR PERIODIC DESCALING OF FOOD SERVICE EQUIPMENT.

Acidic product based on phosphoric acid for descaling equipment in the food industry (boilers, washing machines, and dishwashers). It removes scale deposits caused by high water hardness. Scent-free. Requires rinsing with clean running potable water. Certified by the National Institute of Hygiene.

WORKING SOLUTION / HOW TO USE:

- average concentration: 10-100 ml/1 l of water;
- time of action: 15-30 minutes;
- heaters: concentration of 300 ml/1 l of water;
- after descaling, wash the device thoroughly with clean running potable water;
- if necessary, make a stronger solution and repeat the operation.

**GRAN® GLASS**

READY TO USE. CAN BE USED IN NEGATIVE TEMPERATURES.

A product for cleaning refrigerators and freezers, as well as various types of glass and plastic containers used in the food service industry. Degreases the cleaned surfaces, leaving no streaks or stains. The product does not require rinsing. Can be used in temperatures down to -20°C. Eliminates unpleasant odors from refrigeration equipment. Certified by the National Institute of Hygiene. Dermatologically tested.

WORKING SOLUTION / HOW TO USE:

- at above-zero temperatures: 1:10;
- at sub-zero temperatures: without diluting;
- apply the solution on the surface;
- scrub;
- collect the dissolved dirt;
- wipe the surface dry.

GRAN® PRES AGD

POWDER, CONCENTRATE.
CLEANING OF COFFEE MACHINES.

An active oxygen-based powder for cleaning coffee machines and removing stubborn deposits. Removes contaminants from porcelain, earthenware and internal surfaces of thermos. Recommended for coffee makers of all types.

WORKING SOLUTION / HOW TO USE:

- use according to the coffee machines instructions or create a 1-2% working solution;
- immerse the previously dismantled module and leave it for about 15 minutes, then thoroughly wash and rinse with water;
- for semi-automatic coffee machines, pour 1-2 teaspoons of the powder (about 10-20 g) into the blind strainer; turn on brewing for about 5-10 sec; after about 30 sec, turn on brewing again and repeat the process until the strainer is completely empty;
- flush the system thoroughly with clean water.

GRAN® KAM AGD

POWDER, CONCENTRATE.
DESCALING OF COFFEE MACHINES.

A product for removing lime deposits from household appliances. Recommended for use in kettles, drip coffee machines, pressure coffee makers, and other home appliances where limescale builds up.

WORKING SOLUTION / HOW TO USE:

- coffee machines, dishwashers, etc.: use according to the instructions of the machine or create a working solution of about 2-5%;
- pour into the vessel/device to be cleaned;
- leave for 20-30 minutes, then pour out the contents;
- rinse abundantly with potable water;
- washing machine: pour about 100 g of the product instead of washing powder into the empty washing machine and switch on the washing cycle for about 20-30 minutes, using a water temperature setting of up to 60°C;
- do not use on galvanized sheet metal.

DEGREASING AND WASHING

For all surfaces!

UNIVERSAL DEGREASER

READY TO USE – SURFACE DEGREASING.

The latest generation of a degreasing and cleaning product! The revolutionary formula cleans and degreases – removing even the toughest dirt. The sprayer makes it possible to spread the product into the hardest-to-reach corners. The all-purpose degreaser is perfect for the kitchen, garage and garden. Cleans and removes dirt from both hard and textile surfaces. Does not contain hydroxides.

WORKING SOLUTION / HOW TO USE:

Apply on the surface to be cleaned, leave for a short time and then wipe dry.

For surfaces in contact with food, rinse the surface with clean potable water after washing.

CAR MAX

CONCENTRATE. WASHING OF VEHICLE BODIES. ACTIVE FOAM.

A foaming, alkaline product with a wide range of applications. Characterized by high efficiency of action. Used for frequent washing of the body of motor vehicles, passenger cars, off-road vehicles, buses, etc. Recommended for all types of vehicle washes as an initial spray product.

WORKING SOLUTION / HOW TO USE:

Use it in the form of a water solution depending on the degree of contamination of the surface:

Sprayer and lances:

- sprayer: in winter: dilution rate 1:20, in summer: dilution rate 1:50;
- foam lance: in winter: dilution rate 1:1, in summer: dilution rate 1:2;
- turbo spray: 2% (200 mL/10 L of water).

Vehicle wash stands: 1% solution (100 mL/10 L of water).

Hand washing: 1% solution (100 mL/10 L of water).

Wash off with water under pressure (110-130 bar).

Note: Do not allow it to dry on the vehicle body! Avoid using the product on sun-heated surfaces.

8

MONOTRUCK

CONCENTRATE. WASHING OF ALL VEHICLE EXTERIOR TYPES – ACTIVE FOAM

A highly alkaline product for cleaning heavily soiled vehicle bodies, sides, tires, chassis and tarpaulins. Recommended for washing vehicles: cars, commercial vehicles, trucks, off-road vehicles, buses and quads. Can be used in brush and touchless vehicle wash stands for pre-spraying and principal cleaning.

WORKING SOLUTION / HOW TO USE:

- use it in the form of a water solution depending on the degree of contamination of the surface:
- sprayer: winter period – 1:30, summer period – 1:50;
- engine washing: 1:20;
- foam lance: winter period – 1:4, summer period – 1:5;
- hand washers: 0.5% solution (50 mL/10 L of water);
- wash off with water at high pressure.

TRUCK CLEAN® EXTRA

CONCENTRATE. WASHING OF TRUCKS, TRAILERS AND TARPULINS. ACTIVE FOAM – EXTRA STRENGTH.

Strong active foam for cleaning extremely soiled alkali-resistant surfaces. Recommended for washing trucks, tarpaulins, agricultural machines and special purpose equipment.

WORKING SOLUTION / HOW TO USE:

- dual-phase product – mix (shake several times) before use;
 - sprayer: in winter 1:50 with water, in summer: 1:100;
 - engine washing: dilution of 1:15 to 1:30 with water;
 - foam lance: summer period: 1:5 with water;
 - winter period: 1:3 with water;
 - hand washing: working solution: 0.5% (50 ml/10 l of water);
 - wash the surface with clean water preferably under high pressure;
- Note: Do not allow it to dry on the vehicle body! Avoid using the product on sun-heated surfaces.

car wash

ROLLEX®

CONCENTRATE. BODY SHINE AND MAINTENANCE. HYDROWAX.

A new concentrated, highly efficient hydrowax (polymer) for shining and maintaining vehicle exteriors. Protects paints from the negative influence of weather conditions (temperature, moisture) and, to a large extent, reduces the effect of UV radiation. Facilitates water repulsion, thus speeding up the drying process without additional air blowing (water-repellent effect). Recommended for any type of vehicle wash stand.

WORKING SOLUTION / HOW TO USE:

Preservation and drying: high-pressure washing: 1:500 with water (0.2% - 20 mL/10 l of water) - (15-25 g/car). Rinse with water.

Hand washing: 1:500 with water (0.2% - 20 mL/10 l of water). Apply with a pneumatic or hand sprayer. The product can be used diluted with water over a wide temperature range (20-60°C).

For better results, dilute with demineralized water. When using municipal (hard) water for rinsing, wipe and polish the car body dry with a soft cloth.

PRIX

READY TO USE. REMOVAL OF METALLIC IMPURITIES FROM VEHICLE PAINT AND WHEEL RIMS.

A pH-neutral product designed to remove metallic impurities from the surface of vehicle paint and wheel rims. It removes baked on contaminants such as brake and road dust. When the product comes into contact with metallic impurities, a chemical reaction occurs, during which a red color is emitted - the "bleeding rims" effect.

WORKING SOLUTION / HOW TO USE:

- make sure the surface is not hot;
- shake the product and spray the surface of the dirtied area;
- wait about 2-3 minutes, until the "bleeding rims" effect occurs;
- then wash off with water at high pressure.

BLACK TYRE

TIRE BLACKENER WITH
A SHINY NEW TIRE EFFECT

The unique formula (contains polysilane emulsions), works well both as a protector of new elements and a product for renewing visibly faded materials. Creates a flexible water-repellent coat that hinders dirt deposition and restores the original color of the material. Spread over a clean and dry surface with an applicator and allow it to soak in. Repeat to enhance the effect.

WORKING SOLUTION / HOW TO USE:

Shake the container before use.
Use without diluting. Apply only on clean and dry surfaces, if possible not under direct sunlight.
Spread a thick coat of the product evenly with an applicator and leave it to be absorbed.
If the product is absorbed quickly, apply another coat.

LEDER CLEAN GT

READY TO USE. CLEANING OF PATENT LEATHER PRODUCTS.

A cleaning and washing product for heavily soiled leather surfaces. Removes old and recent organic dirt. Safe for the leather being cleaned. Greatly reduces the resoling process and leaves a long-lasting fresh fragrance.

WORKING SOLUTION / HOW TO USE:

- spread over the surface with a brush (preferably natural horsehair);
 - wait about 15-20 sec. and then gently scrub the leather surface;
 - wipe with a fine fiber cloth rinsed in clean running water.
- Note: Do not use on oiled leather! When treating discolored suede or nubuck surfaces, the cleaning effect may be unsatisfactory.

600 ML - WW053B600

25

car wash

LEDER CARE GT

READY TO USE. REGULAR CARE AND MAINTENANCE.

A product designed for the regular care and maintenance of natural and artificial leather. Prevents dryness and cracking due to its content of moisturizing substances. Naturally revitalizes the color of the leather, makes it more flexible and more resistant to external factors such as UV radiation, humidity, and temperature - thus prolonging its life. Recommended for patent leather with durable color.

Important! Do not use on nubuck and suede! Do not use on oiled leather!

WORKING SOLUTION / HOW TO USE:

- apply with a cloth or sponge and spread over the entire surface of the leather;
- allow it to dry;
- for better results, repeat the process twice;
- can be used after washing or dry cleaning.

600 ML - WW054B600

26

car wash

LEDER CREAM

READY TO USE. PROTECTION, WATERPROOFING OF LEATHER.

Product is in the form of a cream. Prevents dryness and cracking. Revitalizes the color of the leather and makes it more resistant to external factors (UV radiation, humidity and temperature). Prevents dirt from penetrating inside. Leaves a fresh, clean fragrance.

Note: Do not use on nubuck and suede! Do not use on oiled leather!

WORKING SOLUTION / HOW TO USE:

- apply with an applicator and spread over the entire surface of the leather;
 - leave to dry; if necessary, repeat the operation twice.
- Important! Can be used after washing or dry cleaning.

600 ML - WW055B600

27 car wash

TEXTIL WASH

CONCENTRATE. WASHING OF SEATS, CARPETS AND UPHOLSTERY (TEXTILES).

A product for washing textile surfaces by extraction or by hand with a brush or sponge. Has cleaning and degreasing properties. Brings colors to life. Recommended for regular cleaning and maintenance of all types of textile surfaces.

WORKING SOLUTION / HOW TO USE:

- washing (with a brush or a washing vacuum cleaner): 50-500 ml/10 l of water;
- stain removal: 1:3 to 1:5 with water;
- rinse with water (preferably using a washing vacuum cleaner);
- in case of heavy dirt, repeat the cleaning.

1 L - AA010A001

29 car wash

CABRIO PROT

READY TO USE. WATERPROOFING, PROTECTION AGAINST MOISTURE.

A product for waterproofing tarpaulin (textile) roofs in convertible cars. It protects the surface from fading, moisture, penetration of dirt into the structure, salt and weathering. It revitalizes the color and forms a protective coat to facilitate water drainage. The waterproofed surface strongly repels water, causing it not to soak in, but to run off in the form of water droplets.

WORKING SOLUTION / HOW TO USE:

- cover the clean and dry tarp roof of the convertible car evenly with a sprayer and let it dry.

Important! Check the color fastness of the fabric before application!

600 ML - WW089B600

30 car wash

TEXTIL WASH GT

READY TO USE. WASHING OF TEXTILES

It washes and refreshes textile surfaces of all types. Recommended for fabric upholstery.

WORKING SOLUTION / HOW TO USE:

- apply to the soiled surface with a sprayer;
- if necessary, scrub the surface with a soft brush;
- vacuum away the dirt with a washing vacuum cleaner;
- then rinse thoroughly with running water and allow to dry.

600 ML - WW017B600

31 car wash

APC IN GT

READY TO USE. DETAILED CLEANING OF INTERIOR SURFACES – ALL-PURPOSE.

A ready-to-use, all-purpose cleaning and washing product for heavily soiled surfaces. It eliminates old, as well as recent organic dirt. Designed for cleaning leather surfaces (grain, patent leather), textiles with permanent colors, plastics, wood surfaces and laminates.

WORKING SOLUTION / HOW TO USE:

APC IN GT (ready to use):

- apply the solution gently with a sprayer;
- spread thoroughly over the entire surface, wait about 15-20 sec., then scrub with a soft brush or sponge;
- afterwards, collect the dirt, rinse, and wipe dry;
- textile surfaces – vacuum off the dirt, rinse the surface using a dry-wet vacuum cleaner.

APC IN

CONCENTRATE. DEEP CLEANING OF INTERIOR SURFACES – ALL-PURPOSE.

All-purpose cleaning and washing product for heavily soiled surfaces. It eliminates old and recent organic dirt. Designed for cleaning leather surfaces (grain, patent leather), textiles with permanent colors, plastics, wood surfaces and laminates.

WORKING SOLUTION / HOW TO USE:

- create a suitable working solution: 10% for cleaning of leather/wood surfaces; 20% for stain removal/detailed cleaning; 5% for cleaning of textile surfaces; 2% for cleaning of plastics/laminates;
- apply with a sprayer to the cleaned surface;
- after about 15-20 sec., scrub with a soft brush or sponge;
- rinse or wipe several times with a clean, wet cloth.

33 car wash

TOPEFEKT® STR

CONCENTRATE. DETAILED CLEANING, STAIN REMOVAL.

A low-foaming alkaline product for machine and hand washing of all heavily soiled, alkali-resistant industrial floors. It dissolves impurities of grease and oil origin. It can be used as a stain remover for greasy stains on textile carpets. Recommended for heavily soiled carpets and truck seats.

WORKING SOLUTION / HOW TO USE:

In case of textile surfaces (rugs, seats, upholstery):

- for stains – apply locally without diluting about 3 minutes before washing;
- as an additive to laundry detergents: 5 ml/1 l of water;
- heavy dirt: 20-50 ml/1 l of water;
- apply the solution with a sprayer, scrub lightly with a brush;
- vacuum off the dirt and rinse with clean water using a washing vacuum cleaner.

1L - II001A001
10 L - II001A010

34 car wash

POWDER EX

LAUNDRY POWDER FOR TEXTILES INCORPORATES A STAIN REMOVER.

An effective, odorless powder for use with vacuum cleaners for cleaning upholstery, ceiling linings, carpets and rugs. Removes stains and organic contaminants without causing damage to the material. The extracts contained in the powder deeply penetrate the fiber structure and effectively remove dirt and stains at the same time. For extremely tough dirt, use the "TORNADOR" device.

WORKING SOLUTION / HOW TO USE:

- create a solution of 10-20 g/1 l of warm water;
- mix thoroughly;
- upholstery, carpets, rugs: apply to the soiled surface, scrub lightly; vacuum off the dirt and rinse using a washing vacuum cleaner;
- ceiling linings: apply with a sponge; scrub, then wipe the surface; vacuum off the dirt and rinse using a washing vacuum cleaner.

NOTE: Check color fastness before use! The product contains active oxygen!

ODOR OFF NANO

READY TO USE. ODOR REMOVAL

A smell neutralizer. Eliminates unpleasant odors of organic origin through oxidation, purifies the air and maintains a lasting freshness effect. Counters the irritating odors of tobacco smoke, animal and plant material, sweat, urine, fish and rotting odors. Reduces the growth of bacteria, fungi and mold. Contains silver nanoparticles. Dermatologically tested.

WORKING SOLUTION / HOW TO USE:

- perform the work at room temperature;
- shake well before each use;
- apply the product on the previously cleaned odor-emitting surface with a sprayer and let it dry;
- exposure to light definitely improves and speeds up the effect.

600 ML - WW019B600

BETORAST®

CONCENTRATE. REMOVAL OF RUST, SCALE AND CONCRETE FROM VEHICLES.

A strongly acidic product for removing rust, limescale, and cement deposits from acid-resistant surfaces. Contains corrosion inhibitors. Designed for removing concrete from motor vehicles and specialized construction equipment. Recommended for thorough cleaning. Contains hydrochloric acid.

WORKING SOLUTION / HOW TO USE:

- before using the product, remove excess concrete using a high-pressure water jet;
- create a 1:5 to 1:10 solution with water, apply it on the surface with a sprayer, and leave for a few minutes;
- then wash thoroughly with pressurized water; do not allow the surface covered with the working solution to dry.

Important! Do not use on chrome-plated, nickel-plated, enameled surfaces! Do not allow the product to dry on the washed surface!

BETORAST® STRONG

CONCENTRATE. REMOVAL OF CONCRETE FROM CONSTRUCTION MACHINERY – EXTRA STRENGTH.

A highly concentrated product for removing concrete, cement residue, and other construction dirt. Recommended for cleaning construction machinery, concrete mixers, drum mixers, molds for concrete slab and bricks production, manual construction equipment, and scaffolding. Characterized by quick and effective action. Contains inorganic acids up to 35% of the total solution.

Note: Use only on surfaces resistant to hydrochloric acid!

WORKING SOLUTION / HOW TO USE:

- create a 5-20% solution (0.5-2 l / 10 l of water) depending on the contamination;
 - apply on the surface with a sprayer and leave for several minutes;
 - then wash thoroughly with high-pressure water.
- Important! Do not use on chrome-plated, nickel-plated, enameled surfaces! Do not allow the washed surface to dry!

48

car wash

TRACTOR WASHING

CONCENTRATE. WASHING OF AGRICULTURAL EQUIPMENT: TRACTORS, HARVESTERS, SEEDING MACHINES, ETC.

A highly alkaline concentrate for cleaning heavily soiled tractors and agricultural machinery and equipment. Removes dirt of organic origin (animal fats, vegetable fats, petroleum-based fats), bird droppings, pollen, dried mud, clay and fertilizer residues. Cleans, shines and provides long-lasting protection against repeated dirt adhesion. Thanks to its complexing compounds, it works well mixed with cold hard water. It is an active foam that works as a 2% solution, which means that only a small amount of the product is needed to achieve a satisfactory cleaning effect. SAFE FOR THE ENVIRONMENT, BIODEGRADABLE.

WORKING SOLUTION / HOW TO USE:

- prepare a working solution in accordance with the cleaning technique;
- foam lance:
- thorough WASHING – heavy DIRT: 1:1 with water, REGULAR cleaning: 1:9 with water;
- spray washing – foamer, sprayer:
- regular washing: 1:50 with water, or a 2% solution (200 ml per 10 liters of water);
- thorough cleaning of heavy dirt: 1:20 with water, i.e. a 5% solution (500 ML per 10 liters of water);
- apply the solution to the surface. Wait 1 to 2 minutes depending on the degree of contamination;
- wash off with water at high pressure.

NOTE: The quality of the foam depends on the temperature and the humidity. Do not use on heated surfaces or in intense sunlight! Do not allow the product to dry on the washed surface!

PRE-SOAK MEGA PLUS

AN INTENSIVE PRE-SPRAY FOR CAR WASHES.

A highly concentrated product for initial application to all vehicle external surfaces to remove dirt such as sand, mud, pollen, soot and fresh bird droppings.

Characterized by efficiency, effectiveness and speed of action. Due to its significant content of complexing compounds and surfactants, it additionally softens water, thus enabling very quick moistening with simultaneous detachment of dirt from the surface.

Recommended for any type of car washes with automatic dosing systems. Safe for expensive and delicate body trim. Leaves surfaces pre-cleaned and ready for washing.

WORKING SOLUTION / HOW TO USE:

- set the concentration of 0.2% (1:500) on the dispenser;
- apply and thoroughly spread the solution over the entire surface of the vehicle;
- after a while (1-2 minutes), wash off the remaining dirt with cold running water under pressure.

WORKING SOLUTION / HOW TO USE:

- pour the powder into the dispenser;
- program the consumption per 1 min. (check the effect of the washing);
- wash off the road dirt by spreading the working solution on the vehicle body from a short distance;
- rinse with clean running water (according to the car wash program).

Note: Using demineralized water significantly improves the visual effect of the vehicle body after rinsing.

car wash pro

ROLLEX T-WAX JASMINE

A HYDROWAX FOR WET SHINE AND MAINTENANCE OF VEHICLE BODIES

A concentrated wax (polymer) for polishing and maintaining vehicle external surfaces – jasmine scent. Protects paints from the negative influence of atmospheric factors (temperature, moisture) – and, to a large extent, reduces the effect of UV radiation. Facilitates water repulsion, thus speeding up the drying process without additional air blowing (water-repellent effect). Recommended for any type of vehicle wash stand with automatic dosing systems – after thorough washing of the vehicle (as a self-polishing and drying product).

WORKING SOLUTION / HOW TO USE:

- set the concentration of 0.2% (1:500) to 0.4% on the dispenser. Feed through the dispenser without additional dilution;
- apply and thoroughly spread the solution over the entire surface of the vehicle (softened water at the temperature of 20-30°C). After a while, wash off the excess with demineralized water under pressure and let it dry.

Concentrate: pH 5
Working solution: pH 6±7

2 L - AA212A002
25 L - AA212A025

ROLLEX G-WAX JASMINE

VEHICLE BODY SHINE AND MAINTENANCE WAX, SUPERCONCENTRATE.

A highly concentrated wax (polymer) for self-polishing and maintenance of vehicle external surfaces – jasmine scent. Protects paints from the negative influence of atmospheric factors (temperature, moisture) – and, to a large extent, reduces the effect of UV radiation.

Facilitates water repulsion, thus speeding up the drying process without additional air blowing (water-repellent effect). Recommended for any type of car wash with automatic dosing systems – after thorough washing of the vehicle (as a self-polishing and drying product).

WORKING SOLUTION / HOW TO USE:

- prepare a 1:2.5 premix solution with water (preferably demineralized);
- set a concentration of 0.2% to 0.4% on the dispenser; the output concentration will be 0.097% (1:1066) to 0.11%;
- apply and thoroughly spread the solution over the entire surface of the vehicle (mixed with softened water at a temperature of 20-30°C);
- after a while, wash off the excess with demineralized water under pressure and let it dry.

DEEP CLEANING OF VEHICLE EXTERIORS

A set of specialized products dedicated to treating specific surfaces or stains that cannot be removed by regular manual cleaning with standard neutral or alkaline products.

PRIX

READY TO USE REMOVAL OF IRON DEPOSITS
FROM WHEEL RIMS AND EXTERNAL PAINT

A product for dissolving metallic residues such as brake pad dust and volatile rust – has a visual "bleeding" effect. Due to its neutral pH, it can be safely applied to alloy (including polished aluminum) and chrome-plated wheels, as well as on paint.

ACCESSORIES

The effectiveness of car cosmetic products also depends to a large extent on how and under what conditions they are used. We have selected the accessories we offer to ensure that our products are as effective and easy to work with as possible.

MICROFIBER 400 GSM

TS0002

This high-quality microfiber cloth designed by a Danish manufacturer using microfiber technology consists of a blend of ultra-fine polyester (70%) and polyamide (30%) fibers to ensure effective cleaning of any surface. Essential for hand polishing, it eliminates the risk of scratching any painted surface. When used dry, it attracts dust perfectly. When wet, it absorbs water and dirt perfectly. After rinsing with water, it is immediately ready for reuse. Dimensions: 38x38 cm. Grammage: 400 g

MICROFIBER CLOTH 250 GSM

TS0001

This high-quality microfiber cloth designed by a Danish manufacturer using microfiber technology consists of a blend of ultra-fine polyester (70%) and polyamide (30%) fibers to ensure effective cleaning of any surface. Essential for hand polishing, it eliminates the risk of scratching any painted surface. When used dry, it attracts dust perfectly. When wet, it absorbs water and dirt perfectly. After rinsing with water, it is immediately ready for reuse. Dimensions: 38x38 cm. Grammage: 250 g

CLAY BAR 100 G

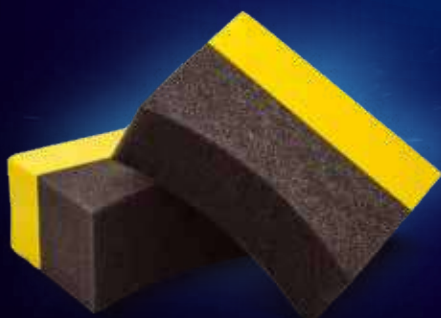

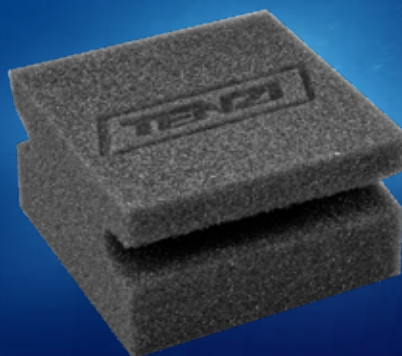

TG0002

A high-quality, high-performance clay for use on painted surfaces to eliminate invisible contaminants that were not removed during traditional washing. It removes heavy dirt surface contaminants adhering to the car body such as grease, dirt, brake dust, tar and mineral dirt. Weight: 100 g

APPLICATOR

TZ0005

A gentle wax applicator, made of sturdy foam, ensures safe and effective waxing of the vehicle. It has no seams or welds, thus minimizing the risk of micro-scratches on the paint and guaranteeing a perfect application effect.

TIRE APPLIATOR

TZ0049

Convenient applicator for manual application of agents in the form of lotion and wax, especially for tires and external plastic elements.

HORSEHAIR BRUSH

TP0004

The brush is great for cleaning leather and textile upholstery, as well as plastic trim parts. The soft and dense bristles make it safe for cleaning all surfaces, and the wooden, specially shaped handle makes it easy to scrub with precision.

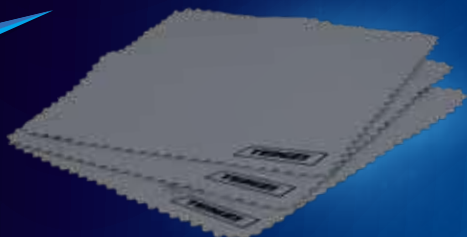

SOFT CLOTH 10X10 CM

TS0004

An extremely soft and handy cloth for wrapping a precision applicator for liquid quartz-ceramic coatings. It does not scratch the paint and reduces the absorption of the product by the applicator, thus allowing more efficient distribution over the protected surface.

Dimensions: 10x10 cm

SPONGE FOR WASHING TWO-SIDED

TZ0049

The sponge, gentle to the paint with one side perforated, effectively supports thorough hand washing of the car body. Its durability makes it ideal for car washes. It does not scratch surfaces. Dimensions: length: 21 cm, width: 11 cm, height: 7 cm

PRECISE APPLICATOR

TZ0055

A handy two-part applicator composed of a thin absorbent coat and a foam handle for easy spreading of dense products. Dimensions: 8 cm x 4 cm x 3 cm

DRYING TOWEL 400 GSM

TS0003

A very soft and absorbent microfiber towel. Absorbs water perfectly and does not leave marks or stains. The identical structure on both sides ensures efficient work, and the edge trim protects paint from scratches.

Dimensions: 60x90 cm. Grammage: 400

QUARTZ SHAMPOO®

A MUST HAVE! A revolutionary shampoo with quartz content

A revolutionary washing product – a car shampoo that forms a quartz protective coating on the paint during washing. The quartz coating dramatically improves the appearance of the paint, protects it from the weather conditions, and makes it more difficult for dirt to settle on it. The distinctive feature of this shampoo with quartz content is its high water repellency, which is formed as early as during washing. The liquid quartz contained in the Quartz Shampoo eliminates foam, but without reducing the shampoo's cleaning properties. Each subsequent washing with this auto shampoo prolongs the life of the quartz coating.

PRODUCES A SUPER SHINE EFFECT

QUARTZ SPRAY

Quick detailer

An innovative product developed on the basis of nanotechnology for the protection of car bodies. The unique formula of this product contains particles of liquid quartz and provides long-lasting protection and shine to the paint, increasing the intensity of its color and protecting it from weather conditions and UV rays. The product leaves a super water-repellent effect on the surface of the car body and windows. It can be applied to both dry and wet paint. Extremely easy to use.

CARNAUBA WAX

Protection of the car body, waxing of the car with natural wax

A high quality natural car wax to protect the car body. Its formula is based on traditional carnauba wax with the addition of PTFE. It provides long-lasting protection and additional shine to the paint for up to 12 months. This wax effectively covers pores and micro-scratches. It makes the car body very resistant to weather conditions and UV radiation. It also forms a water repellent coating on the car body, thus further enhancing its color depth and giving it a striking shine.

NATURAL WAX - BASED COATINGS

We also offer a wide selection of protective products based on carnauba - the hardest of all natural waxes. Its distinguishing feature, in addition to its high durability, is the curing time that has to be observed before polishing. CARNAUBA WAX is a cream that effectively fills micro-scratches and provides many months of protection. It is complemented by the CARNAUBA SPRAY quick detailer, which enhances the depth of the color brilliantly.

WINDOWS

SUMMER: AD123

SEASONAL WINDSHIELD WASHER LIQUIDS

Allows excellent visibility all year round

An extremely effective windshield washer fluid with a pleasant, exotically fruity fragrance. It is safe for all surfaces and coatings. It does not leave streaks. In the summer version, it removes insect residue and road contaminants. In the winter version, it does not freeze on the windshield and works in temperatures down to -22°C. It perfectly removes light traffic film. It leaves a fine film on the windshield, making it easier to remove dirt each time it is used.

A ready to use product, suitable for all types of windshield washers..

DE-ICER

A convenient spray for defrosting car windows in winter

An effective product for quick defrosting of car windows. This window defroster works at temperatures as low as -70 degrees Celsius. The defrosting effect is visible immediately after application on any icy window surface. The Tenzi Detailer De-Icer is safe for rubber gaskets and windshield wipers. Its use prevents the scratching of windows caused by plastic scrapers.

BLEEDING RIM®

TOP!

Cleaning and care of wheel rims

An innovative and professional product for cleaning wheel rims to remove stubborn metallic dirt, rust and brake pad dust. Its name comes from the red color of the product when it comes into contact with dirt. This makes it easy to see how much the rim needed cleaning. The product has a gel form and is thick enough to flow more slowly and thus more effectively penetrate the entire rim surface. The product can be used to clean alloy, chrome-plated, and painted rims alike. The Bleeding Rim has a slightly acidic pH of 5, so it can also be used on paint.

TIRES, RIMS, AND HUBCAPS

Metal wheel components are some of the car parts that get dirty the most often. For their daily washing, we offer the effective CLEAN RIM product with a slightly alkaline reaction, and the BLEEDING RIM® deironizer, which, due to its slightly acidic pH, is also suitable for washing alloy, polished and chrome-plated rims.

TIRE & RUBBER
Maintenance of car tires and plastics

An innovative nano cream for the maintenance of tires and plastic parts in cars. Thanks to a modern quartz formula, the product penetrates the surface of the rubber, making tires look like new and resistant to cracking and crumbling. The product also renews faded plastics by creating a durable coating on them to protect them from dirt buildup and UV rays. In addition, it restores the original black color and produces a "new look" effect.

TIRE & PLASTIC
Shine and protection of car tires

An effective, highly efficient and convenient dressing for the maintenance of tires and plastic parts. It intensively shines and protects tires from the weather conditions, producing an instant "new tire" effect. The product brilliantly enhances the color of the treated surface and protects it from re-deposition of dirt, making it easy to clean. The spray form allows the product to be applied both directly to the tire and with an applicator or cloth. The product can also be applied on surfaces that are not completely dry.

LEATHER CONDITIONER

Preservation of a car's leather upholstery

Conditioning lotion for clean leather surfaces in the car. Thanks to its unique formula and creamy texture, it perfectly penetrates the surface of the leather to form a long-lasting protective film. The product restores the leather's natural color and its original elasticity. It prevents cracking and dirt from penetrating the micro-pores. It revitalizes the surface's color without an artificial shining effect. At the same time, it does not change either its texture or its color. The product is safe for both natural and artificial leather.
